

# My Medication List

Ask your doctor and pharmacist these questions about your medications

What is it for?

How should I take it? (How often? Can I take it with food? Etc.)

What are the important side effects?

Is there a generic version of this drug that I can use instead?

Does this drug interact with any of my other medications, vitamins or herbal/nutritional supplements?

Generic	Brand Name	Purpose/Condition	Dose	How do I take it	Things to look out for	What does the medicine look like?
(Example) Simvastatin	(Example) Zocor	(Example) Lower cholesterol	(Example) 2 pills (40mg)	(Example) Each night	(Example) May cause heartburn	(Example) White pill
